## *Report on Mock Interview*

A mock interview was conducted on 09.01.2019 for the final year students for facing the interview without any fear. In this, first the group discussion was conducted. Many students were struggled at the beginning to deliver their ideas in English. But the tips were given to them to start the session with slow and simple English. Moreover they were taught not to interfere when a person is speaking. No negative thoughts should be passed during the session. The body language during the discussion was discussed to a greater amount.

The methods of facing the written test were then taken. In this, how the time should be allotment for each and every question. The students were told that, normally a question paper will be having many categories and at least a minimum number of questions should be answered in each category. Omitting a category will bring a negative opinion. Moreover the answers will be normally in choice pattern and once the answer for a particular question is given it should not be changed. The change of answer will indicate that you are not a steady person. There will be negative marks in some tests and much care should be taken while answering these question papers as we will be losing marks for wrong answers.

Finally the personal and technical interview was conducted for the students by a panel. In this the students were asked to tell about them. Majority of the students was unable to start with an easy flow. They were pacified and again a chance was given to them. A lot of questions were put to them and the way they answered was noticed and at the end of the interview the mistakes which was done by them was projected to them. Remedy measures were told to them to rectify the mistakes.
